

WeldRo®

BENCH TYPE ELECTRODE OVEN KE150-MS

A Highly Reliable Holding, Re-baking and reconditioning Electrode oven of mild steel inner casing and outer epoxy casing, durable against corrosion.

Sturdily constructed for maximum performance and convenience for good quality welding.

- Dries off moisture
- Guard against rejects
- Eliminate rework
- Protect welding profits
- Removable shelving for use with flux and wire coils
- Even Heat distribution and fast temperature recovery

SPECIFICATIONS:

Model	KE150-MS
Electrode Capacity	150 KG
Electrode Length	254mm - 457mm (Also accomodates wire rolls)
Heating Elements (2)	1400W total
Voltage	AC 240V / 420V (Single phase 50 / 60 cycles)
Temperature Range & Control	50°C - 350°C (Adjustable thermostat control with pilot light)
Insulation	50mm glass fiber batt
Inside Diameter	457mm x 482mm
Shelved Compartments	3 (Removable for wire rolls)
Exterior Dimensions	750mm x 570mm x 580mm
Net Weight	57 Kgs
