

WELDING ELECTRODE

POWERWELD CASTARC 150N

AWS A5.15 ENIFE-CL

Application:

Graphite basic coated electrode with a Fe-Ni alloy deposit for joining and repairing nodular cast iron. Deposit is homogeneous and highly resistance against cracks. Particularly recommended for dissimilar welding of cast iron to steels and cast iron construction. Good bonding and flow of the weld metal.

SPECIFICATIONS:

AWS Specification	AWS A5.15 ENiFe-Cl
JIS Specification	N/A
Other Specification	N/A
Available Size	2.6mm, 3.2mm, 4.0mm
