

WELDING ELECTRODE

POWERWELD STABLEARC18

AWS A5.1 E7018

Iron power low hydrogen type covered electrode for mild steel and 490MPa high tensile strength steel

Features:

- Suitable for butt and fillet welding of heavy structure
- Good performance by DC-EP current

SPECIFICATIONS:

AWS Specification	AWS A5.1 E7018
JIS Specification	Z3212 D5016
Other Specification	BS E5154B 120 24(H)
Size	2.6mm, 3.2mm, 4.0mm, 5.0mm
