

WELDING ELECTRODE

POWERWELD STAINARC 316L

AWS A5.4 E316L-16

SMAW Stick Electrode

Application:

For welding and cladding on austenitic Cr-Ni-Mo stainless steels and clad plates. Applied for service temperature from -120°C up to + 400°C. In the Chemical and Petrochemical industries, Refineries, Food industries and for Ship Building to weld pipes, tanks, heat exchangers.

SPECIFICATIONS:

AWS Specification	AWS A5.4 E316L-16
JIS Specification	N/A
Other Specification	N/A
Available Size	2.6mm, 3.2mm, 4.0mm
